DIGITAL “ASTRONOMIC” TIMER FOR LOW VOLTAGE LIGHTING SYSTEMS

This timer calculates the time for dusk and dawn for every day of the year. Devices can be turned on and off at specific times of the day or at sunrise/sunset. Automatically adjusts for daylight savings time. Consult the manufacturer’s instructions, included in the package, to determine the suitability for your application.

Features:

- Up to 7 ON/OFF settings.
- Individually selectable active days.
- Astronomic timing feature calculates dusk and dawn for each day of the year. Can be selected by one of 3 groups of your location: North, Central and South.
- Sunrise and sunset times can be offset by a desired time period.
- Automatically adjusts for daylight savings time, or not, as necessary.
- Easy to read liquid crystal display.
- 3-prong grounded male plug is located on the back of the timer, near the bottom.
- Dual timed receptacles go on and off simultaneously. One on the left and the other on the right of the timer.
- Manual ON/OFF button for immediate override
- Digital timing accuracy to one minute per year. The time of day can be programmed to the second for synchronizing activation of multiple devices.
- Rechargeable battery backup, in case of power failure. The time and program will be retained for 3 months of when fully charged.
- Works with CFL (Compact Fluorescent Lamp) and LED (Light Emitting Diode) loads.
- Can be programmed while unplugged and taken to a job site.
- UL-listed for the USA and Canada.
- The included operation instructions are in English, Spanish, and French.
