### FOLLOW-UP

April 5, 2018

Dear Valued Customers:

As you were previously advised, Paige Wire & Cable has learned that certain of its irrigation wire products which were certified to us as being ETL listed may not fully comply with the associated Underwriters Laboratory and ETL specifications for listing. As a result, we have implemented a recall of the following products:

- 18AWG-Multi Conductor, spec P7183D
- 14AWG/2 and 12AWG/2 Landscape Lighting cable, spec P7190D
- 14 and 12AWG Type UF wire, spec P7001D
- 14 and 12AWG Type PE wire, spec P7079D
- 16AWG Type ULECC, Spec P7002D
- 14/2 TORO Decoder Cable, spec P7350D
- 14/2 Hunter Decoder Cable, spec P7354D
- 14AWG/2 Maxi Cable, spec P7072D

Please note that (i) the 14/2 TORO Decoder Cable, spec P7350D, that is identified above has been added to the recall; and (ii) a specification for the 14/2 Hunter Decoder Cable that was misnumbered in the recall letter has been corrected.

Paige values its reputation for quality and service, which is one reason that it has moved so quickly to implement a recall of these potentially non-complying products. Paige encourages you to take advantage of this recall offer and to contact your Paige Sales Rep to obtain an RMA to implement the return. If, for any reason, you choose to retain any of these products, it is incumbent upon you to share the information provided by Paige, regarding the reported non-compliance of these goods with applicable UL and ETL listing specifications, with all downstream customers and other transferees of the recalled goods.

Needless to say, I apologize for the inconvenience this has caused and pledge my complete effort in addressing our customer's needs.
